

Arm Vibrato Steps to Success:

- Place the pad of the thumb against the neck of the violin.
- Move the knuckle away from the neck so that it does not inhibit the vibrato movement. The thumb pad is the only thing to touch the neck.
- While hovering the fingers over the strings, move from the elbow so that the hand rocks back and forth over the strings. The thumb pad is stationary.
- The vibrato motion is toward and away from your face. Do not rock the wrist from side to side!

Reminder: The pulse of all exercises should be ♩ = 70.
